

LES JOUETS JAPONAIS

**JAPANESE TOYS
FROM THE LATE 50's & 60's**

*A mon ami disparu Michel Wirth
qui m'a fait découvrir et aimer les jouets*

JACKY BROUTIN

Amateur de jouets japonais depuis une dizaine d'années, j'ai vu le nombre de collectionneurs passionnés par ces jouets augmenter considérablement, surtout ces cinq dernières années.

Les Japonais eux-mêmes, conscients de l'importance de leur patrimoine industriel se mettent également à collectionner les jouets «Made in Japan» dont la production était, jusqu'à une époque encore récente, essentiellement destinée à l'exportation. Non seulement les jouets japonais des années 1950 et 60 sont rares au Japon, mais la documentation qui les référence y est presque inexistante.

Pensant répondre à un besoin des amateurs du monde entier, j'ai essayé de regrouper dans cet ouvrage le plus possible de références émises par les fabricants de jouets japonais : autos, avions, bateaux, jouets mécaniques, à piles, robots, motos, comics, etc.

Au cours de mes recherches, j'ai appris confidentiellement, que, les fabricants japonais changeaient l'intégralité de leur production tous les cinq ans environ, ce qui implique qu'un jouet figurant sur un catalogue de 1960 n'est pas une nouveauté de l'année mais a pu être fabriqué dès 1955.

* * * * *

Interested by the Japanese toys since the last 10 years, I have seen the number of collectors growing, specially these past 5 years.

Even the Japanese collectors got the idea to buy back their Industrial patrimony, as for many years their own production was only for export. Then there is nothing much left in toys over there, it's even worse concerning the catalogues.

So I try to put altogether the catalogues of all the Japanese toys makers I could get, to help collectors of all kind: cars, planes, boats, mechanical toys, batteries operating, robots, motorcycles, comics, etc.

During my research I heard that Japanese makers were changing their complete production every 5 years or so. It means that a toy seen on a 1960 catalogue is not necessarily a new toy from that year but could have been made as early as 1955.

Special thanks to Mr Teru Kitahara and Tsuneaki Niikura from Tokyo

Whom lend us some catalogs from their personal collection.
